Re. FEI sampling kits for horses

To Whom It May Concern:

On behalf of the Fédération Equestre Internationale (FEI), we can confirm that the medication control equipment, currently used in our MCP anti-doping control programs, is being manufactured by Berlinger & Co A.G. The sampling kits are used for collection of urine and blood samples in competition horses. The kits are also being used in a number of international competitions outside the MCP program.

The sampling equipment used in FEI competitions must meet the highest standards to safeguard integrity and security of the sample involved. To our knowledge the safety and integrity of the Berlinger sample collection equipment has not been challenged successfully; the FEI is confident that these materials meet international standards.

Kind regards,
