

## Handling instructions for the break cap (hand device) for the BREG-KIT small

1. Put the plastic container into the plastic cup.
2. Place the metal break cap onto the security cap.
3. Use a hammer (not too small) and hit smoothly 2-3 times onto the device.
4. Remove the metal break cap and turn off the separated security cap. (to protect your hands from injuries, use the plastic pad to open the cap)
