

# Streamline Your Cold Chain Supply Management

With a long-standing history of excellence in their fields, Suvoda and Berlinger offer a partnership to transform cold chain supply through speed, simplicity, and reliability

## A Partnership You Can Trust

---

**Suvoda:** Suvoda is a global innovator in Interactive Response Technology (IRT) that solves complex patient randomization and supply chain needs in clinical trials. They offer exceptional customer and advisory services to make trials safer for patients and easier for clinical teams. [www.suvoda.com](http://www.suvoda.com)

**Berlinger:** The Swiss company Berlinger & Co. AG develops, produces and distributes innovative temperature monitoring solutions for pharmaceutical and medical technology products with the aim to further improve efficiency and increase patient safety. ## Simplify Temperature Excursion Management with an Integrated, Automated Solution

Streamline your drug supply management workflow, support patient safety, and gain end-to-end visibility into temperature-controlled shipments. Our partnership provides an effortless integration of Suvoda IRT with Berlinger's Q-Tag data loggers so that your study team can:

### ✓ Improve Quality & Efficiency

Automated quarantine process improves quality of temperature management to meet GxP requirements and reduce time, effort, cost and risk of error

### ✓ Decrease Drug Wastage

IRT automatically alerts users to potential temperature excursions so supply teams can perform timely mitigative actions as needed

### ✓ Reduce Risk

Real-time data integration increases confidence in treatment safety and efficacy

### ✓ Enhance Compliance

Ensure quality of response to audits and inspections with robust data reporting and true end-to-end visibility of the temperature profile
